Soft Skills: Thorough and pay attention to detail, Able to write computer programs, Persistent and determined, Flexible and open to change, Able to use my own initiative and have problem-solving skills, Self-learner

PROJECTS

- **StockApp** is an online single-page web application that enables you to manage orders and inventory with the ability to get, add, edit, or delete products, firms, brands, sales, and purchases. Technical stack: HTML, CSS, JavaScript, React, and Material.UI in the front-end, React context and Redux Toolkit for state management.

- **Fireblog App** is a personal blog app aiming to create blog posts using firebase realtime-database and display them on the dashboard. Adding, deleting and updating blog posts can be done. In the project, firebase realtime-database library was used for storing data, Material UI library for styling, react-router library for page transitions, formik and yup libraries for form structure and validation, and react-toastify library for notifications. In addition, firebase was used for login and authorization processes.

PROFESSIONAL EXPERIENCE

Software Developer, Brc Nail Studio, US (Remote)   May 2024 - Aug 2024
- Developed corporate website and application, adhering to deadlines %100.
- Utilized TypeScript to develop a large-scale React-based project, resulting in a 40% reduction in development time and improved code quality.
- Ensured Client satisfaction by 100%, leading customer satisfaction and sales numbers by 10%.
- Integrated 3rd party reservation services providing app-service compliance 100%.
